

# Patient Instructions for Rhophylac

The order for the Rhophylac vaccine must be hand delivered to the 2<sup>nd</sup> floor of the Jonsson building, "Registration" area. The location is represented by the red star on the map below. Valet parking is available, but not reimbursable. Parking garage 4 is the closest garage to the check in area and is located just before the Jonsson building on the left side of Junius.

Upon checking in you will be prompted to complete necessary consents and ensure your preregistration process is complete. From here you will have your blood drawn and await the results. Once the results are reported, the Rhophylac vaccine will be given to you in a sealed envelope. You will need to bring the Rhophylac to our office for administration. If you don't come straight to the office, the vaccine will need to be refrigerated. The full process could take up to 2 hours so please allow enough time to complete the process before your scheduled appointment.
